

# SAFER2028 Day

**Date: 2.4.2025**

**Location: Innopoli 1 & 2, Tekniikantie 12 & 14, Espoo**

## Morning Session, Innopoli 2, room Edison1&2

08:30 - 09:00 Registration and Coffee

09:00 - 09:20 Welcome and Opening Remarks, *Juho Korteniemi, MEAE*

09:20 - 09:40 What's New for SAFER2028 for Its Second Half, *Tomi Routamo, STUK*

09:40 - 10:20 News from End Users & Outlook on Research Needs:

- 09:40 - 10:00 *Anne Kontula, TVO*
- 10:00 - 10:20 *Eero Vesaoja, Fortum*

**10:20 - 10:50 Coffee Break**

- 10:50 - 11:10 *Tomi Routamo, STUK*
- 11:10 - 11:30 *Susanna Aro, Posiva*

11:30 - 11:50 Greetings from the Swedish Radiation Safety Authority, *Cheuk Lau, SSM*

11:50 - 12:10 Infrastructure Funding for 2026-2028, *Mikko Lemmetty, TVO*

12:10 - 12:30 Q&A and Discussion

**12:30 - 13:30 Lunch**

## Parallel Afternoon Sessions, Innopoli 1&2

13:30 - 16:30 Session 1: Overall Safety and Society, Edison 2, Innopoli 2

- Chair: *Paula Savioja, STUK*

13:30 - 16:30 Session 2: Reactor Safety and Fuel Lifecycle, Hippocrates, Innopoli 1

- Chair: *Eero Virtanen, STUK*

13:30 - 16:30 Session 3: Nuclear Waste Management, Edison 1, Innopoli 2

- Chair: *Petri Jussila, STUK*

13:30 - 16:30 Session 4: Mechanical and Structural Safety of Nuclear Power Plants, Galileo, Innopoli 1

- Chair: *Tarja Nuoranne, STUK*

**~ 15:00 Coffee break**

## Parallel Afternoon Session Agendas

**Note:** No online participation option for afternoon sessions - all sessions at Innopoli 1 or 2!

### Session A: Overall Safety and Society, room Edison 2, Innopoli 2

| Time  | First name            | Last name  | Organisation | Topic                                                                                          |
|-------|-----------------------|------------|--------------|------------------------------------------------------------------------------------------------|
| 13:30 | Merja                 | Airola     | VTT          | AIDA - AI enhanced stakeholder engagement and risk communication for future nuclear deployment |
| 13:40 | Ludovic               | Fulop      | VTT          | OSPATO - Open seismic platform and data toolbox                                                |
| 13:50 | Hanna                 | Koskinen   | VTT          | EASILY - Intelligent human system integration throughout the nuclear plant lifecycle           |
| 14:00 | Ulpu                  | Leijala    | FMI          | MAWECLI - Hazardous external events in the warmer and altering climate                         |
| 14:10 | Sami                  | Naumer     | VTT          | CHARMAS – Preparation for Finland for SMR deployment                                           |
| 14:20 | Antti                 | Pakonen    | VTT          | CHAINS - Safety assessment of complex functional chains in nuclear I&C                         |
| 14:30 | Tero                  | Tyrväinen  | VTT          | RILTO - Risk-informed decision support for long-time operation using AI                        |
| 14:50 | <b>Coffee break</b>   |            |              |                                                                                                |
| 15:20 | Nikhil                | Verma      | VTT          | FASAANI2 - Fire Safety, Fire PRA, Cable Fires, SMR, Wildfires                                  |
| 15:30 | Juhani                | Vihavainen | LUT          | PASAFE - Passive Systems in Overall Safety                                                     |
| 15:40 | Kim                   | Calonius   | VTT          | TOPAZ - Total plant fragility in external hazards                                              |
| 15:50 | Kaupo                 | Viitanen   | VTT          | LANOS - Leadership and Safety Culture in New Forms of Organizing for Assuring Nuclear Safety   |
| 16:00 | Arto                  | Laikari    | VTT          | DITOCO-2 - Digital Twin Integration for Radioactive Repositories                               |
| 16:10 | <b>End of session</b> |            |              |                                                                                                |

**Session B: Reactor Safety and Fuel, room Hippocrates, Innopoli 1**

| Time                        | First name  | Last name   | Organisation | Topic                                                                                                                              |
|-----------------------------|-------------|-------------|--------------|------------------------------------------------------------------------------------------------------------------------------------|
| 13:30                       | Asko        | Arkoma      | VTT          | FORMA - Modelling and cladding experimental Assessments                                                                            |
| 13:40                       | Asko        | Arkoma      | VTT          | RENOIR - Radionuclide Emission and Source Term Investigation through Modelling and Experimental Research                           |
| 13:50                       | Giteshkumar | Patel       | LUT          | Enhancing the understanding of interfacial heat and mass transfer phenomena of two-phase flows                                     |
| 14:00                       | Giteshkumar | Patel       | LUT          | Experimental study of cold liquid mixing in BWR downcomer                                                                          |
| 14:10                       | Lauri       | Pyy         | LUT          | C-FLOW continuation project - experimentally investigating two-phase critical flow with CRAFTY facility                            |
| 14:20                       | Heikki      | Suikkanen   | LUT          | Flow-induced vibrations in fuel                                                                                                    |
| 14:30                       | Ville       | Valtavirta  | VTT          | SYSI - Core level simulation advances                                                                                              |
| 14:40                       | Tatu        | Hovi        | VTT          | Understanding Thermal-Hydraulic Phenomena Through Computational Modeling (U-TERM)                                                  |
| 14:50                       | Suvi        | Lamminmäki  | VTT          | MOFI - Metal-Organic Framework Integration for Iodine Filtration and Immobilization                                                |
| <b>15:00 Coffee break</b>   |             |             |              |                                                                                                                                    |
| 15:30                       | Eero        | Karola      | VTT          | SOPIS - Study on plant behaviour in various scenarios                                                                              |
| 15:40                       | Rebekka     | Komu        | VTT          | COCONUTS - Coupled codes for transient analysis                                                                                    |
| 15:50                       | Ana         | Jambrina    | VTT          | RECODOS - Reactor Computational Dosimetry, RPVI, LTO, Surveillance Programme, Fuel Campaigns, Shielding, and Radiation Protection  |
| 16:00                       | Ana         | Jambrina    | VTT          | DETMORE - Detector Modelling and Signal Reconstruction, Energy Deposition, I&C, Core Protection & Monitoring System                |
| 16:10                       | Ana         | Jambrina    | VTT          | RADTRAN - Radiation Transport, NDE, DPA, Safeguards, Active/Passive Interrogation Techniques, Materials Lifespan Characterization. |
| 16:20                       | Pauli       | Juutilainen | VTT          | KRITU - Criticality safety during final disposal                                                                                   |
| <b>16:30 End of session</b> |             |             |              |                                                                                                                                    |

**Session C: Nuclear Waste Management, room Edison 1, Innopoli 2**

| Time                        | First name | Last name   | Organisation | Topic                                                                                                                             |
|-----------------------------|------------|-------------|--------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>13:30</b>                | Fahim      | Al Neshawy  | Aalto        | PERCO3 - Durability performance of concrete in LILW repositories                                                                  |
| <b>13:40</b>                | Ahsan      | Chonche     | VTT          | CULFIX - Surface microcracks in Cu-OFP exposed to water with sulphide at elevated temperatures                                    |
| <b>13:50</b>                | Jon        | Engström    | GTK          | Faults, Fractures and Porosity - Defining the sub-surface parameters                                                              |
| <b>14:00</b>                | Otto       | Fabritius   | HU           | Radionuclides' transport in cementitious materials                                                                                |
| <b>14:10</b>                | Yushan     | Gu          | VTT          | MICROWISE - Methods for Immobilizing Challenging Resin-based Operational Wastes for Improved Safety and Efficiency                |
| <b>14:20</b>                | Soroush    | Majlesi     | HU           | <sup>14</sup> C Dynamics and Biosphere Assessment in Terrestrial and Aquatic Ecosystems: Uptake, Risks, and Environmental Impacts |
| <b>14:30</b>                | Jukka      | Kuva        | GTK          | HAGEN - Experimental and modelling research of bentonite for safe disposal of spent nuclear fuel                                  |
| <b>14:40</b>                | Kaisa      | Nikkilä     | ÅA           | Fluid Flow and Mineral Alteration: Controlling Porosity and Permeability                                                          |
| <b>14:50</b>                | Saara      | Söyrinki    | VTT          | CoW-MatE - Corrosion behaviour of welded steels in the LILW repositories – effect of materials and environment                    |
| <b>15:00 Coffee break</b>   |            |             |              |                                                                                                                                   |
| <b>15:30</b>                | Sami       | Naumer      | VTT          | BUTLER - Backward U-process Technique for Less Expensive Repositories                                                             |
| <b>15:40</b>                | Joni       | Tanttu      | JyU          | Fluid and Mineral Infiltration in Crystalline Bedrock Fractures                                                                   |
| <b>15:50</b>                | Minna      | Vikman      | VTT          | The influence of microbial processes on the performance of EBS (PROPER)                                                           |
| <b>16:00</b>                | Riikka     | Kietäväinen | VTT          | DODGE^2 - Dark oxygen production in the deep subsurface                                                                           |
| <b>16:10</b>                | Mikko      | Vepsäläinen | VTT          | HERA - High-efficiency radionuclide removal with porous nanomaterials                                                             |
| <b>16:20</b>                | Gianni     | Vettese     | VTT          | ABCRad - 2 - Chemical behaviour and interactions of key, risk-driving radionuclides with alternative buffer materials             |
| <b>16:30 End of session</b> |            |             |              |                                                                                                                                   |

**Session D: Mechanical and Structural Integrity of NPP's, room Galileo, Innopoli 1**

| Time                        | First name | Last name | Organisation | Topic                                                                                                                                         |
|-----------------------------|------------|-----------|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| 13:30                       | Pentti     | Arffman   | VTT          | Constraint, irradiation embrittlement and RPV safety                                                                                          |
| 13:40                       | Miguel     | Ferreira  | VTT          | FN-CAMP II - Continuation regarding performance of concrete structures for nuclear safety regarding LTO                                       |
| 13:50                       | Erkka      | Frankberg | TUNI         | 3D printing of SiC fiber reinforced SiC composites                                                                                            |
| 14:00                       | Noora      | Hytönen   | VTT          | MAFIS - Modelling and characterisation of fracture initiation in RPV welds, understanding failure probability in heterogeneous microstructure |
| 14:10                       | Noora      | Hytönen   | VTT          | JULES - Jules Horowitz Reactor Participation and Instrumentation Development.                                                                 |
| 14:20                       | Tuomas     | Riipinen  | VTT          | SADENA - SAfe use of Directed Energy Deposition components in Nuclear Applications                                                            |
| 14:30                       | Iikka      | Virkkunen | Aalto        | DeepNDE - Non-Destructive Evaluation of Welded Pipes' Structural Integrity in Nuclear Plants                                                  |
| 14:40                       | Konsta     | Sipilä    | VTT          | WAMOS - Water chemistry and material degradation study supporting lifetime management in nuclear power plants                                 |
| 14:50                       | Konsta     | Sipilä    | VTT          | PACMAN - Polymer ageing and condition monitoring at nuclear power plants                                                                      |
